

SOCIAL NETWORK DOs & DON'Ts

- Only establish and maintain connections with people you know and trust. Review your connections often. Confirm that the
 connections are valid. There are many fake profiles for individuals out there. Confirm that the "Friend" you accept is truly
 the person and not an imposter. Review their profile for details, pictures and the number of friends they have.
- Assume that ANYONE can see any information about your activities, personal life, or professional life that you post and share.
- Ensure that your family takes similar precautions with their accounts; their privacy and sharing settings can expose your personal data.
- Avoid posting or tagging images of you or your family that clearly show your face. Select pictures taken at a distance, at an angle, or otherwise concealed. Don't use your face as a profile photo, instead, use cartoons or avatars.
- Use secure browser settings when possible and monitor your browsing history to ensure that you recognize all access points.
- Add extra security to your account every time you log in on an unknown phone or computer by applying two-factor authentication.
- Do not login to or link third-party sites (e.g. Twitter, Bing) using your Facebook account. "Facebook Connect" shares your information, and your friends' information, with third party sites that may aggregate and misuse personal information. Also, use as few apps as possible. Apps such as Farmville access and share your personal data.

- "Friends" and "Only Me" under each

FI PROFILE PICTURE

Manage who sees your profile picture or control your profile appearance by removing/deleting your profile picture. Use an avatar or do not upload your personal picture at all. To update your profile picture, navigate to your profile page by clicking on your name. Then, hover your mouse over your profile picture to display update option. Click on update to edit your picture.

PASSWORD RECOMMENDATIONS

- Minimum of 8 characters is recommended.
- Use a combination of upper and lowercase letters, numbers and symbols/punctuation marks.
- Should not contain your name, username, phone number, birthday, pets' names or other personal information.
- Should be unique to each app or website you use.
- Don't use common words (dictionary, iloveyou, password) or series of letters (qwerty, abcd1234).
- Using a longer passphrase or series of words may be easier to remember and more secure.
